

Mythics Awarded Contract to Support Department of Homeland Security (DHS) - U.S. Citizenship and Immigration Services (USCIS)

Company to Provide Comprehensive Technical and Operational Support Services Deploying Centralized Enterprise Level Business Intelligence Reporting and Analytics.

VIRGINIA BEACH, Va., Nov. 11, 2009 -- Mythics today announced that it has been awarded a prime contract by the U.S. Citizenship and Immigration Services (USCIS), with team member Opus Group to provide comprehensive technical and operational support services supporting the Standard Analysis Reporting Tool (SMART), a USCIS initiative spearheaded by the Office of Information Technology (OIT). SMART's primary objective is to provide the USCIS and its users a centralized, enterprise level business intelligence tool to access USCIS data sources and provide both actionable and intelligent reporting. The contract has a one-year base period of performance and a ceiling value of \$2.4 Million.

U.S. Citizenship and Immigration Services (USCIS) is the government agency that oversees lawful immigration to the United States. Under the contract, the Mythics team will support the organization as required in areas including Oracle Business Intelligence Enterprise Edition (OBIEE) software installation and integration, strategic and organizational planning, development, testing and a production launch of the system. Tasks include but are not limited to system architecture, design, report prototyping and development, metadata layer configuration and validation and the production of standard reports.

"We are pleased to support OIT with our business intelligence and deep technology expertise as it leads, advocates, and coordinates USCIS's efforts to provide robust analytics and reporting capabilities to the agency," said Pat Hillier, President – Mythics Professional Services (MPS) and business unit general manager.
