

# MYTHICS CLOUD ASSESSMENT

UNLOCK YOUR ORGANIZATION'S CLOUD POTENTIAL

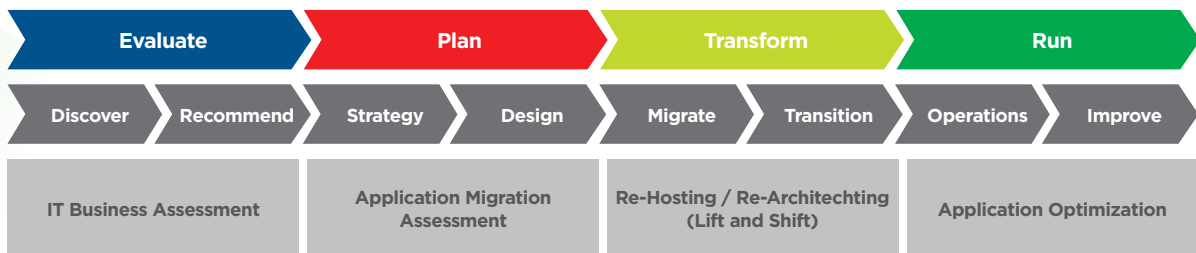

## OVERVIEW

Organizations of all sizes and in all industries are coping with the complexity, cost, and risk around various permutations of cloud computing architectures. Gartner\* has stated that, “[cloud] services do not completely eliminate the need for IT operations management. Customers still need expertise to choose the right service elements and to configure them appropriately”. Mythics has provided our expertise to many customers to guide them in choosing the right services at all layers in the stack – Applications, Middleware, Databases, Virtualization, Servers, Storage, Networking. Application modernization, transition, hosting, and related security requirements increase the complexity even more.

A variety of approaches are taken by organizations to simplify, standardize, increase efficiency, and reduce risk when exploring a cloud computing model. Approaches can range from standardizing on components of a layered stack, standardizing on converged infrastructure, or simply asking the Cloud Service Provider to keep things in check against their needs and requirements.

## OUR CLOUD METHODOLOGY

Mythics is an award winning and recognized leader in Cloud Transformation with a structured process that has proven successful for many different customers. Our enterprise methodology helps customers manage the transformation to cloud across various phases.

In the first component of this engagement, “Evaluate”, our team will work with you to develop and enhance your cloud modernization strategy. Cloud readiness efforts include a Mythics-led planning workshop where we will help your team to scope and define current and future cloud goals. The Assessment is conducted in a fluid, unobtrusive manner with respect to your time commitment. The Mythics Cloud Adoption team will work behind the scenes over the course of the timeline to enhance effectiveness of our joint efforts.

\* Magic Quadrant for Public Cloud Infrastructure Managed Service Providers” March 2, 2017, Gartner ID: G00314772

## OUR CLOUD ASSESSMENT APPROACH

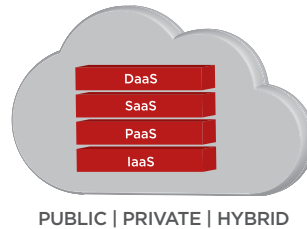

**PROJECT TIMELINE** (EVALUATE PHASE) ~2-4 Week Process with Checkpoints

EXAMPLE ACTIVITIES		EXAMPLE DELIVERABLES	
<ul style="list-style-type: none"> <li>Stakeholder Information</li> <li>Industry Research</li> <li>Data Collection</li> </ul>	<ul style="list-style-type: none"> <li>Readiness Survey</li> <li>Discovery Sessions IT/Bus</li> <li>Success Metrics</li> </ul>	<ul style="list-style-type: none"> <li>Cloud Strategy</li> <li>Solutions Architecture</li> <li>Business Case</li> </ul>	<ul style="list-style-type: none"> <li>Actionable Roadmap</li> <li>Proof Points</li> <li>Best Practices</li> </ul>

The specific activities and deliverables are determined at the beginning of the process and tailored to your requirements. Organizations have found this to be **valuable when creating and justifying budget requests** for modernization or new programs. The assessment deliverables serve as inputs for formation of **an implementation plan leading to a broader roadmap plan**. The activities and deliverables support a cloud modernization methodology leading to detailed planning, migration, and operational sustainment that matches organization funding plans.

This process is an investment in your organization and conducted at **no-cost to you**. Your investment is focused time during the assessment.

The journey to the cloud can be difficult to navigate. Mythics is here to help guide your Cloud Adoption to ensure your success.
